

Print Data Requirements

For the printing of our SAMS-Banners and/or foliation the provided data needs to meet following requirements:

In our workflow we use the following programmes:

- Adobe Photoshop,
- Adobe Illustrator,
- Adobe InDesign,
- QuarkXPress und
- Macromedia Freehand

Please transmit the required data from the above-mentioned programmes including all related components.

Please create the format of the printing file **in a scale of 1:10**.

Create bled-off subjects with a bleed of 3 mm in a scale of 1:10.

Attach all required writings to the documents (only use PostScript-Fonts, True Type vectorising).

Regarding vectorising programmes, please convert all writings (or Logos) into paths.

All colours need to be specified in **CMYK-Mode**.

In the final format the ideal image resolution is 300 dpi.

Please also send us a Preview-PDF.
